WILL PRODUCE 2-BAR COAL CUTTERS;  
TEST NEW COMBINE

ANSWERS DISSATISFACTION OVER PRESENT OUTPUT -- Moscow, Trud, 24 Dec 50

There has been dissatisfaction in the Chelyabinskugol' Combine concerning the lack of two-bar coal cutters, needed to bring production up to its maximum level. Now, according to a statement released by the Main Administration of the Construction of Coal Machinery, the Kopeysk Mining Machinery Plant has been ordered to build ten KMP-1, two-bar cutting machines with blade-type culm removers. In 1951 these machines will be produced in sufficient quantity to meet the demands of the Chelyabinskugol' Combine.

PASSES TESTS SUCCESSFULLY -- Yerevan, Kommunist, 11 Jan 51

A new high-duty coal combine has successfully passed tests in a mine of the Kuznetsugol' Trust. Designed by the Stazhevskiy brothers, the new machine cuts the coal from the face and delivers it to the car.

EFFICIENCY INCREASES WITH PRODUCTION OF NEW EQUIPMENT -- Alma-Ata, Kazakhstanskaya, Pravda, 11 Jan 51

The Karaganda Plant imeni Parkhomenko has put out the first five models of a new loading machine designed by Stalin Prize winner Yegorev. They are designed for loading coal at the mine face.

Assembly work is proceeding on equipment to be sent to concentrating plants of the Kuznetsk basin. The plant is undertaking production of this equipment for the first time.

In the machine shop, continuous machining methods have been introduced, while the assembly of equipment has been sped up 2-3 times.
